

Third Semi-Annual Hospital Price Transparency Report

August 2022

The Third Semi-Annual Hospital Price Transparency Compliance Report August 9, 2022

Under the authority of the Affordable Care Act (ACA), a federal hospital price transparency rule¹ took effect January 1, 2021, requiring hospitals to post all prices online, easily accessible and searchable without having to submit personal identifying information. Prices are required to be in the form of:

- A single machine-readable standard charges file for all items and services for all payers and all plans as well as all discounted cash prices.
- A standard charges display with actual prices or a price estimator tool for the 300 most common shoppable services.

Combined with newly enacted requirements for disclosure of systemwide prices and historical claims in the Transparency in Coverage Rule² and the Consolidated Appropriations Act of 2021³, this rule is intended to provide consumers and employers broad access to pricing information, empowering them to benefit from competition and drive down the costs of care and coverage.

For our third report, being issued nearly twenty months since the Hospital Price Transparency Rule took effect, PatientRightsAdvocate.org’s research team assessed compliance with the law by reviewing 2,000 U.S. hospitals out of the over 6,000 accredited hospitals in the country. Our review of hospital compliance found that consumers are still unable to benefit from the rule due to the continued widespread failure of most hospitals to fully publish their prices across all payers and plans. Meanwhile, the Department of Health and Human Services (HHS) has only issued civil monetary penalties to two hospitals for noncompliance.⁴ See Table 1 for a summary of our three reports.

Of the 2,000 total hospitals reviewed, we found:

- Only 319 (16.0%) were complying with the rule.
- 101 hospitals (5.1%) did not post any standard charges file and were in total noncompliance.
- Although 793 (39.7%) of hospitals posted negotiated prices clearly associated with payers and plans, 407 of the 793 (51.3%) failed compliance because the majority of their pricing data was missing or incomplete.
- Of the three largest hospital systems in the country, HCA Healthcare and Ascension continued to flout the law with zero compliance, while 45 of 111 hospitals owned by CommonSpirit Health, the second largest hospital system, are now in compliance.

Of the 1,000 hospitals reviewed in February 2022 and re-evaluated in this report:

- 97 of the previously noncompliant hospitals have become compliant.
- 26 of the previously compliant hospitals have become noncompliant (18 of them removed plan names from their files, and 8 of them are now missing substantial pricing data).
- 27 hospitals closed, merged with other hospitals, or were not able to be assessed.

Table 1: Hospital Compliance

Report Date	Hospitals Reviewed	Compliant Hospitals	Percentage Compliant
August 2022	2,000	319	16.0%
February 2022	1,000	143	14.3%
July 2021	500	28	5.6%

On June 7, 2022 (more than 17 months after the rule took effect), HHS fined two hospitals for noncompliance with the rule. Northside Hospital Atlanta was fined \$883,180, and Northside Hospital Cherokee was fined \$214,320. Our review shows both hospitals are now fully compliant with the rule. Both hospitals have now posted exemplary files.

This report considers the multiple, detailed criteria required by the rule and may differ from other reports, which may look only for the presence and categories of a hospital pricing file without regard to the completion of all required data fields.

Methodology: PatientRightsAdvocate.org reviewed the websites of a total of 2,000 of the more than 6,000 licensed hospitals in the United States. We evaluated the compliance of the 1,000 hospitals analyzed in our February 2022 report and reviewed an additional 1,000 hospitals subject to the rule. Our findings reflect good-faith analysis and opinions regarding compliance with the full price transparency regulations based on a review of publicly available hospital websites from May 17, 2022 through July 22, 2022. This report is not intended to constitute legal advice.⁵

A team of PatientRightsAdvocate.org research analysts assessed the websites for hospital compliance. Separately, an independent review and validation of the report using a substantial sample of the data were performed from July 3 to July 23, 2022 for PatientRightsAdvocate.org by FireLight Health LLC, an independent healthcare price data company with expertise in hospital price transparency data.

We analyzed each hospital website for inclusion of the required machine-readable file for all items and services, as well as the required price display of the 300 most common shoppable services (70 of which were mandated by the Centers for Medicare and Medicaid Services), either in a consumer-usable standard charges display or a price estimator tool. Within the required machine-readable files, we assessed the completeness of the required data posted including: all associated codes, description of each item or service, gross charges, discounted cash prices, de-identified negotiated minimum and maximum charges, and all payer-specific negotiated charges and clear identification of the negotiated charges with the name of the third-party payer and plan.

If a hospital posted a price estimator tool for the required minimum of 300 consumer shoppable services, we evaluated whether consumers with or without insurance could access negotiated rates and discounted cash prices using the tool. However, it was not practical to evaluate whether *all* 300 shoppable services were available in each of the price estimator tools. Widely varied tool structures and barriers limited or blocked access to price estimates, making price comparisons for the same codes and services across plans unattainable. We were also blocked by barriers such as the collection of personal information and specific plan identification needed for input to receive an estimate. The rule, however, mandates that hospitals enable access to prices without having to submit personally identifiable information.

We identified a hospital as noncompliant if it omitted any of the five standard charge criteria required by the rule, if it posted blanks or zeros in the data fields, if it did not provide descriptions of each item or service, if it did not post all negotiated payer rates associated with specific plans, or if the price estimator tool did not show both the negotiated rates and discounted cash prices to provide pricing for all healthcare consumers, including the uninsured and those desiring to pay cash directly.

Results: Based on our review, we estimate that only 16.0% of the 2,000 hospitals (319/2,000), were in compliance with all of the price transparency rule requirements. We estimate that 84.0% (1,681/2,000) were noncompliant, because one or more price transparency requirements were not met. Interestingly, 97 of the hospitals we found to be noncompliant in our February 2022 Report are now compliant; however, 26 of the hospitals deemed compliant in the February 2022 Report were found noncompliant in this report. Of those 26 hospitals, 18 removed plan names from their files, and 8 are now missing substantial pricing data. While the majority of hospitals continue to demonstrate noncompliance in some form, some hospitals posted exemplary files, including rural hospitals with as few as 25 beds. See Appendix A for example screenshots of hospital pricing files, Appendix B for a list of the 101 hospitals with no standard charges file, Appendix C for a list of the 319 compliant hospitals, and Appendix D for the full list of hospitals reviewed.

Machine Readable, Standard Charges File Compliance

Consistent with our earlier reports, many hospitals identified only payer names and not the associated plan names. We frequently found that hospitals listed a far greater number of “accepted insurance plans” elsewhere on their websites than they showed in their standard charges file, implying that their standard charges file did not include all accepted plans. We deemed files noncompliant due to incomplete or missing data fields, formulas instead of real prices, or fields with zeros, N/A’s, and asterisks for negotiated rates. Also of note, a significant number of hospitals posted their files in obscure locations on their websites, and many posted multiple pricing files with incomplete data in each. These tactics of noncompliance obstruct consumers and technology developers from accessing, parsing, and comparing the pricing data.

We estimate that:

- 83.7% of the hospitals (1,674/2,000) did not post a complete machine-readable file of the actual standard charges.
- 60.4% of the hospitals (1,207/2,000) did not publish all payer-specific negotiated charges “clearly associated with the names of each third-party payer and plan” as required by the rule.
- 52.0% of the hospitals (1,040/2,000) did not publish a sufficient amount of negotiated rates.
- 21.0% of the hospitals (420/2,000) did not publish any discounted cash prices.
- 5.1% of the hospitals (101/2,000) did not post any standard charges pricing file.

300 Shoppable Services Display Compliance

We reviewed each hospital for compliance with the requirement to publish 300 shoppable procedures and services displayed in either a consumer-friendly display or a price estimator tool. We estimate that:

- 21.6% of the hospitals (432/2,000) presented 300 shoppable services in a consumer-friendly display for customary charges. However, 89.1% (385/432) of these hospitals remain noncompliant because their standard charges files were incomplete.
- 82.0% of the hospitals (1,640/2,000) published a price estimator tool, but 81.3% of them (1,333/1,640) were still noncompliant due to incomplete standard charges file. An improvement from the last report, 99.2% of these hospitals (1,627/1,640) displayed the discounted cash price, enabling uninsured patients to see their applicable price.

Discussion: Nearly 20 months have passed since the hospital price transparency rule took effect. As of the date of this publication, our analysis suggests that the vast majority of hospitals remain noncompliant with the rule, and some previously compliant removed pricing data from their files. These findings align with our previous reports and other reports indicating that hospitals continue to provide incomplete or inaccessible pricing information.⁶

Our data also implies that the lack of enforcement by the Department of Health and Human Services (HHS) and issuance of penalties has led hospitals to continue to disregard the rule, blocking tech developers and consumers from being able to compare prices and benefit from competition. However, for the two hospitals to which HHS did issue penalties, their pricing files are now complete and exemplary, demonstrating the efficacy of enforcement.

Specifically, on June 7, 2022, HHS issued a penalty of \$883,180 to Northside Hospital Atlanta and \$214,320 to Northside Hospital Cherokee for noncompliance with the rule. According to its correspondence, the agency first reviewed these hospital websites in early 2021, issued them warning letters, and found no improvement more than a year later. Our review found that on July 1, 2022, both hospitals updated their standard charges files and came into full compliance with the rule.

Our analysis included a review of the websites of hospitals owned by the three largest hospital systems: HCA Healthcare, CommonSpirit Health, and Ascension. While compliance of CommonSpirit-owned hospitals has improved since our last report, we estimate that only 45 (11.8%) of these systems’ combined 382 hospitals are in compliance (See Table 2).

We also reviewed 398 rural hospitals and found that only 43 (10.8%) were compliant, but many of the compliant ones posted excellent standard charges files, as noted in Appendix A.

Our report findings, along with the continued inability for patients and consumers, including employers, to access meaningful, comparative price data, raise the need to address several important issues:

Health System	2021 Revenue	# of Hospitals	Compliant Hospitals	%
HCA Healthcare	\$58.8 billion	186	0	0%
CommonSpirit Health	\$33.3 billion	111	45	40.5%
Ascension	\$27.2 billion	85	0	0%
Total	\$119.3 billion	382	45	11.8%

1. *Stronger, Timely, Transparent Enforcement of Noncompliant Hospitals:* The recent enforcement actions and subsequent full compliance of the penalized hospitals demonstrate the efficacy of issuing penalties. More timely, robust enforcement and transparent disclosure of the enforcement process are likely to positively impact compliance.
2. *Actual Prices vs. Estimates.* “Price estimator tools” generally provide, non-binding estimates (including price ranges) accompanied by disclaimers that do not hold hospitals accountable for final bills that don’t match the quoted estimate. Actual, binding prices – not estimates – for each payer and plan are needed upfront to allow technology developers to access meaningful price information and to empower consumers to understand the true cost of their care and ensure they are not overcharged.
3. *Clear Pricing Data Standards.* Implementing clear pricing standards, including uniform data file standards, will better serve the intent of the rule by enabling technology innovators

and search engines to design online shopping tools and other services that will foster price comparison and competition. We note that the Transparency in Coverage rule has clear, specific, uniform data standards. Our initial review of files posted by insurance companies and employer plans finds much higher compliance, likely due to the mandated pricing data standards.

4. *Attestation of Quality and Completeness of Data.* Given the retraction by hospitals in posting complete pricing data, requiring an attestation from an appropriate hospital executive that the price data file is complete and accurate will strongly incentivize hospital compliance. Similar to the attestation required in submission of Medicare Cost Reports, CMS can require hospital executives to attest that the standard charge data they submit is accurate and complete.

Future Compliance Reports

Our future compliance reports may include additional assessment criteria due to (1) further clarification, guidance, or rulemaking and/or (2) inclusion of items currently required under the rule that were not assessed in the report due to time and resource limitations.

Conclusion

We commend the 319 hospitals that we estimated to be in compliance with the rule. Complete hospital pricing data in full compliance with the rule, combined with data from the Transparency in Coverage Rule and the Consolidated Appropriations Act of 2021, will foster a functional marketplace in healthcare and coverage.

Unfortunately, our review found that most hospitals are withholding crucial information from consumers by not releasing their hospital's actual, complete pricing data or by making the data difficult to access. The two hospitals that were issued penalties for noncompliance posted exemplary files and became compliant soon after, proving the efficacy of enforcement. Our findings demonstrate the need for robust, timely, transparent enforcement by HHS, clear pricing data standards, and accountability of hospital executives to attest to the completeness and accuracy of their prices.

When full compliance with the transparency regulations is achieved, the widespread availability of pricing data systemwide in healthcare will unleash the benefits of competition and consumer choice, lowering the costs of care and coverage to patients, employers, and workers.

LEGEND

To be fully compliant, a Hospital must have:

- A Complete Machine-Readable Standard Charges File; and
- Either:
 - A consumer friendly '300 Shoppable Services List'; or
 - An online Price Estimator Tool

A Complete Machine-Readable Standard Charges File must meet the following criteria. Any hospital that failed to meet any one of the following criteria (with a 'no' answer to any of the questions) was found to have an incomplete machine-readable standard charges file and was found to be NONCOMPLIANT.

CRITERIA	DESCRIPTION
Codes	Did the hospital post one or more of the mandated codes used by the hospital for accounting or billing (e.g. CPT, HCPCS, DRG, NDC) for each of its items and services?
Gross Charge	Did the hospital post gross charges for at least 50 percent of the items and services identified?
Discounted Cash Price	Did the hospital post discounted cash prices for at least 50 percent of the items and services identified?
Negotiated Min	Did the hospital post the de-identified minimum negotiated charge for at least 50 percent of the items and services identified?
Negotiated Max	Did the hospital post the de-identified maximum negotiated charge for at least 50 percent of the items and services identified?
Negotiated Rates	Did the hospital post the payer-specific negotiated charge that applies to each item or service, for at least 50 percent of the items and services identified?
Payer and Plan	Did the hospital post all payer-specific negotiated charges (for all payers and plans at the hospital) in a manner clearly associated with the name of the third-party payer and specific plan, for at least two payers including Blue Cross Blue Shield, United, Cigna, Anthem, or Humana?

We also analyzed each hospital for the following criteria regarding 'shoppable services.' If a hospital's Standard Charges File satisfied each of the above criteria, but it did not also offer either a '300 Shoppable Service List' or an online Price Estimator Tool (PET), it was found to be NONCOMPLIANT.

CRITERIA	DESCRIPTION
300 Shoppable Service	Did the hospital post a list of 300 shoppable services?
Price Estimator Tool (PET)	Did the hospital post a link to a functional price estimator tool?
PET Provides Cash Price	If the hospital has a price estimator tool, does it provide cash prices for items or services that are accessible by an uninsured person?

If a hospital was found to have both a complete machine-readable file of standard charges, and either a 300 Shoppable Service list or PET that provided a cash price, it was found to be COMPLIANT.

Hospital	City	State	Compliance	Complete Standard Charge File												Explanation	Download Date
